Despite turmoil and breakdown in society and new populist leaders that frighten us we are heading towards a brighter future.

«I read it from cover to cover and felt that it did something to me. It lifts your mind and gives positivity and hope. Truly one of the best I've read in a long time!» - Irene H. Aune

Towards a Brighter Future
for You, Mankind and Mother Earth

Norway, (March 1, 2017) – People, Mankind and Mother Earth is plagued by countless problems and crises. Everything from overspending, exploitation, corruption, populist leaders and terrorism to economic differences, poverty, health problems, and loneliness. On top of that, we have huge environmental problems.

These problems can only be taken by their root if we are going to get lasting solutions, otherwise, we only treat the symptoms. By identifying the core causes to our manmade problems and crises, we can change these «vicious circles» we have entangled ourselves into and create «golden circles».

Even if we see breakdowns in the society, there are also plenty of breakthroughs, which don't receive the same amount of attention. This book seeks to reverse this, by offering several «new» thoughts, referrals to solutions, and ways to improve our lives and society.

About the author

Henning Jon Grini was born in Bergen, Norway in 1966. All his adult life he has been concerned with the big questions in life. He is socially engaged, and have started several businesses with the intention of contributing to the planet's best, as well as lifting the human consciousness to a higher level. Currently, he founded the organization Gaiainnovations.
